Frontend & UI/UX developer with 10+ months of hands-on experience building and shipping real products across seven live repositories at an IIT research lab and a startup. Comfortable adapting across styles and tools, iterating fast with clear communication, and using AI-assisted workflows to ship polished prototypes quickly.

EXPERIENCE

Frontend & UI/UX Developer Intern — IIT Ropar (Vicharana Shala) May 2026 – Nov 2026

- Built and maintained UI and frontend features across seven active production repositories in a fast-paced research-lab environment, working independently with clear async communication.
- Owned end-to-end design-to-code work: component design, responsive layouts, and iteration based on direct feedback from the team.
- Adapted quickly to each project's existing design language and codebase, contributing reliably across varied styles and tech stacks.

Repositories: ViBe · Spandan · Spurti · FLN · Tenali · PyBe · Ajrasakha

Frontend Developer — Spaceborn (Startup) Aug 2025 – Dec 2025

- Developed and shipped frontend features in a startup environment, balancing speed with product quality under tight timelines.
- Collaborated directly with founders/product owners to translate requirements into working UI, building strong ownership and independent-execution habits.

SELECTED PROJECTS

StudyArc — education platform
studyarc-dun.vercel.app

Claulancer — freelance marketplace
ethicallancing.vercel.app

Elite Hack 1.0 — hackathon events platform
elite-hack-1-0.vercel.app

AgriReform Vision — agriculture website
agri-reform-vision.vercel.app

Comm Parse Pro — college & recruitment platform
comm-parse-pro.vercel.app

Fitness Nexus — fitness tracking platform
ayushjhaa1187-spec.github.io/Fitness_nexas

Also built: DevFusion (education) · Jan (school platform) · Frontend Odyssey (interactive UI) · Meeting Weaver Insights · OpenClaw (HackIndia project)

SKILLS

UI/UX Design	Wireframing, responsive design, design systems, rapid prototyping, cross-style adaptability
Frontend Dev	HTML, CSS, JavaScript, React, Tailwind CSS, Vercel deployment
Tools & Workflow	Git/GitHub, AI-assisted development for fast shipping, independent async collaboration

ACHIEVEMENTS

- Won website-building competitions at multiple IITs
- Finalist — IIT Kanpur, IIT Madras, IIT Bombay, IIT Delhi, IIT Roorkee, and IISc hackathons/competitions
- Finalist — GDG Hackathon and HackIndia
- 10 months of hands-on experience across UI/UX design and frontend development in multiple domains, plus data-industry exposure aligned with a Data Science background

EDUCATION

Indian Institute of Technology (IIT) Madras Expected Graduation: 2029

B.S. in Data Science & Applications
